Supplementary material

Table S1. Spearman's correlations (bottom left corner) and variance inflation factor (VIF, upper right corner) among seven numerical variables used in non-metric multidimensional scaling (NMDS) analysis.

	Altitude	Ruggedness	Forest	Shrub/grass	Crop/pasture	Artificial const.	Anthrop. activity
Altitude	-	2.239	1.675	1.103	1.233	1.112	1.083
Ruggedness	0.744	-	1.696	1.048	1.618	1.033	1.002
Forest	0.635	0.641	-	1.264	2.159	1.085	1.016
Shrub/grass	−0.305	−0.214	−0.457	-	1.002	1.020	1.086
Crop/pasture	−0.435	−0.618	−0.733	−0.046	-	1.011	1.008
Artificial const.	−0.318	−0.178	−0.280	−0.137	0.104	-	1.001
Direct anthrop. activity	−0.277	−0.040	−0.127	0.281	−0.086	−0.036	-

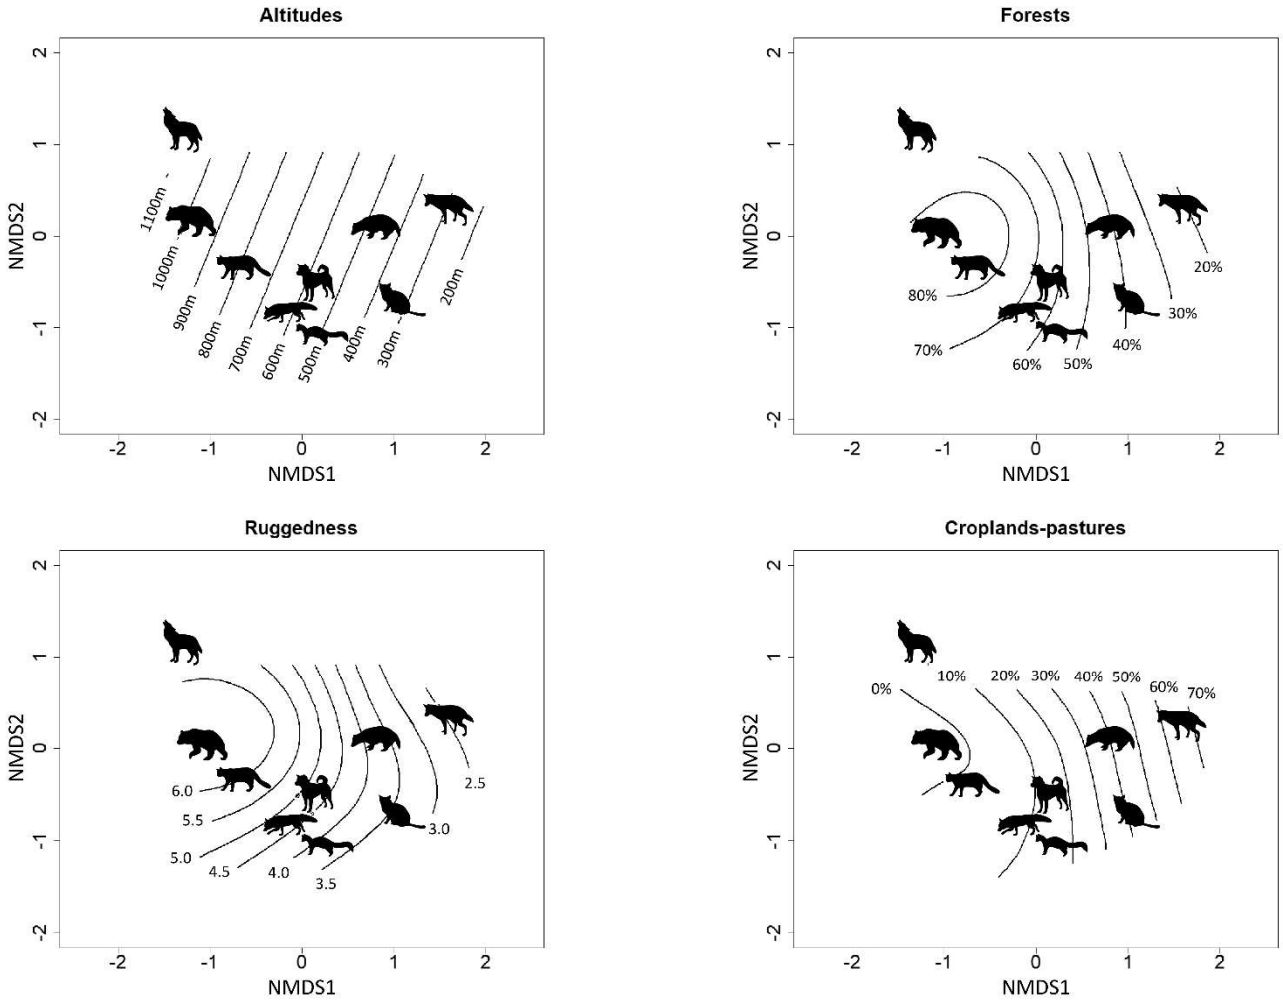

Fig. S2. NMDS ordination plot of four variables with statistical significances ($P < 0.001$).
